

Product solutions for Improved Vision

 **SCHWEIZER**
Der LowVision-Spezialist

ImproVision
LowVision Solutions

Who we are

ImproVision is a **subsidiary of SCHWEIZER** and services the company's global export activities. Established in 1840, **SCHWEIZER** is one of the oldest **owner-managed** companies in the German ophthalmic optics sector and boasts one of the **world's largest ranges of specialist visual optical aids**.

SCHWEIZER stands for **many firsts in low vision care** – be it the world's first modular magnifier system with interchangeable magnification heads, the world's first LED illuminated magnifier, the world's first ergonomic magnifier or the **world's first magnifier with inductive charging**.

Unrivalled quality is another pillar of SCHWEIZER's strategy. All its illuminated and reading magnifiers are still **"Made in Germany"** at the company's German headquarters in Forchheim.

More ...

... about us and our range of product solutions can be found at

www.improvision-lvs.com

or

What we offer

... global access to SCHWEIZER's range of **product solutions** for improved vision in addition to our own range of high addition and light protection spectacles.

... professional advice, technical expertise and bespoke support to **help our partners grow** their business.

... regular and comprehensive **professional training**, be it in the classroom or online through our partner www.optik-akademie.com.

Your benefits

- Professional expertise
- Innovative products
- Cutting-edge technology
- Dedicated support
- Global presence tailored to local needs
- Continuing professional development

Do you have questions about our products or do you need further information?

Please give us a call. We have just the specialist expertise you need!

The retinal image can be enlarged by reducing the distance between the object and the eye below the normal reading distance (relative distance or approach magnification).

However, the presbyopic eye is no longer able to focus on objects at such a close distance. This loss of accommodative ability requires corrective optics such as high addition spectacles.

Patients with binocular potential need glasses with base-in prisms to support convergence.

High addition spectacles

Contents

Magnifiers are one of the traditional aids to improve vision and are thus a preferred solution for visually impaired people.

They are used wherever it is necessary to enlarge an image. Be it for reading, in cases of reduced visual acuity, or to see details more clearly in hobby or leisure activities.

Illuminated magnifiers combine such an enlarged image with the advantages of optimised lighting. Individually tested light temperatures improve contrast vision and thus visual acuity.

Modern illuminated magnifiers are mainly battery-operated. One of the latest innovations in this field uses wireless charging and thus eliminates the need to replace batteries.

LED illuminated hand magnifiers

■ ERGO-Lux i mobil

ERGO-Lux i mobil – the lifestyle magnifier with inductive charging. In addition to 2 brightness levels and a choice of 3 light temperatures, the key advantage of this new magnifier lies in its wireless charging capability which eliminates the need to replace batteries.

- Power supply by induction (Qi standard) – no battery replacement, no cable inserted into the magnifier
- Easy-to-feel boost switch provides audible feedback when operated and controls 2 brightness levels for optimised lighting
- Rechargeable lithium-polymer battery with 7-hour operating time at boost level and max. 3-hour charging time; just 10 min. charging needed for 1 hour light
- High contrast, even spread of light thanks to ideal adjustment of light intensity
- Ergonomic design and soft-touch zone for extra grip strength and pleasant feel in timeless white/charcoal grey
- Convenient integrated lanyard loop
- Aspheric lightweight lenses
- Supplied with microfibre pouch for storage and cleaning
- Order any of these magnifiers without charging pad, USB cable and USB power adapter by taking -1 off the item no. (e.g. 152122)

■ ERGO mobil Base

The ERGO mobil Base reading and writing stand converts any ERGO-Lux MP mobil or ERGO-Lux i mobil hand magnifier into a stand magnifier WITHOUT COMPROMISING image quality.

- Versatile design enables use in different positions – ideal for work where both hands are required
- Suitable for left and right-handed use
- Black matt, textured surface promotes stable grip
- For mobile use, simply remove the magnifier from the stand
- A total of 12 stands in individual heights are available for the different magnifier powers, ranging from 6 D to 56 D to provide exactly the right distance to the object viewed
- Suitable ERGO-Lux MP/ERGO-Lux i mobil magnifiers available separately

56 D / Ø 35 mm

LED illuminated hand magnifiers

ERGO-Lux MP

Lifestyle magnifier with multi-chip SMD LED and **Multi-Power** light option in a choice of 3 light temperatures.

- Easy-to-feel boost switch provides audible feedback when operated and controls 2 brightness levels for optimised lighting
- High contrast, even spread of light thanks to ideal adjustment of light intensity
- Ergonomic design supports hand and arm for relaxed, stress-free position
- Correct distance between the object and the lens is found automatically when the handle end rests on the object
- Easy battery replacement thanks to hinged battery box cover
- Aspheric lightweight lens
- Supplied with microfibre pouch for storage and cleaning
- 3 AAA alkaline batteries required
- Order any of these magnifiers as a complete set including ERGO-Lux Base by adding -SET to the item no. (e.g. 170162-SET)

Box ERGO-Lux MP

LED illuminated stand magnifiers

■ MODULAR LED

Battery operated illuminated stand magnifier with 3 multi-chip SMD LEDs in a choice of 3 light temperatures.

- Easily interchangeable open magnification heads, available in different magnification powers
- Possibility to write under the low power lenses
- Adjustable head tilt for right or left-handed use
- Very bright, consistent and high-contrast light through 3 precisely aligned special light emitting diodes
- Easy battery replacement thanks to hinged battery box cover
- Aspheric lightweight lens
- Supplied with microfibre pouch for storage and cleaning
- 3 AA alkaline batteries required

■ TWIN-Lux MP

LED illuminated stand magnifier with **Multi-Power** light option and three multi-chip SMD LEDs in a choice of 3 light temperatures.

- Easy-to-feel boost switch provides audible feedback when operated and controls 2 brightness levels for optimised lighting
- Very bright, consistent and high-contrast light through 3 precisely aligned multi-chip SMD LEDs
- Comfortable reading posture through ergonomically tilted design
- 3.5x magnification thanks to aspheric lightweight lenses placed at an accurately computed distance
- Wide field of view covers the entire span of a typical newspaper column
- 20-hour operating time at boost level
- Supplied with microfibre pouch for storage and cleaning
- 3 AA alkaline batteries required

Aspheric hand magnifiers

■ ERGO-Style

Ergonomic reading magnifier in a modern style.

- Ergonomic design supports hand and arm for a relaxed, stress-free position
- Correct distance between the object and the lens is found automatically when the handle end rests on the object
- Timeless colour combination of white and charcoal grey
- Aspheric lightweight lens
- Supplied with microfibre pouch for storage and cleaning

These aspheric hand magnifiers are also available with LED illumination. For further information, please refer to page 18.

■ RIDO-Clip

- 2 joined lenses including prisms to support convergence
- Clips to the spectacles of the wearer
- 3 different magnification powers
- Hard coating
- Solid case included

In comparison with standard magnifiers, this clip-on magnifier has some advantages:

- Lightweight
- Wide field of view
- Base-in prisms improve eye convergence
- Simply clips onto spectacles for ease of use
- Allows hand-free activities

934001 RIDO-Clip set with all lens parts

Contents: Clip and one lens part each in 3.0 D, 5.5 D, 7.0 D

Displays

■ SlimLine

Floor stand display to promote sales of SCHWEIZER magnifiers. Appealing product exhibition in a modern silver anodised finish. Fits in every ambience.

- Well-arranged and clear presentation of products
- Easy to handle
- Attractive teaser
- Flexible positioning, moves smoothly on 4 castors (lockable)
- Holds up to 8 boxes (includes 4 box holders, additional box holders available separately)
- Single package for convenient shipment

■ Universal Display

Black coated metal display with exchangeable A4-sized insert. Comes with 3 magnetic holders. Can also be used without holders to present other SCHWEIZER products.

LowVision lamps

One of the key elements of low vision solutions is the provision of special lighting to suit the patient's individual needs.

Multiple studies conducted with visually impaired people have shown that the provision of appropriate lighting can significantly improve visual acuity. An individually tested light temperature is more pleasant and improves visibility for reading or other close tasks noticeably. Optimised lighting can often significantly reduce the magnification power otherwise required.

The innovative MULTILIGHT Pro lamp series by SCHWEIZER has been developed with the user's needs in mind and is ideal for all visually impaired people.

Made in Germany not only stands for sophisticated technology and maximum durability thanks to selected materials, but also for an elegant design and intelligent functionality – produced locally in Forchheim/ Germany.

LowVision lamps

MULTILIGHT Pro

Designed for visually impaired people, the MULTILIGHT Pro LED lamp series features numerous innovative ideas.

- 7 different product versions for multiple applications
- Large central control panel in contrasting colour for easy one-touch operation
- Audible ON/OFF feedback
- Low energy consumption and high performance
- Available in 3 light temperatures (warm white – 2700 K, neutral white – 4500 K and cool white – 6500 K)
- Features the tried and tested LEDs of SCHWEIZER's illuminated magnifiers – no mixing of light temperatures!
- 2 brightness levels (100% and 70%)
- Lithium-ion battery with approx. 4-hour operating time and approx. 3-hour charging time
- Easy-to-recognise battery status
- Flexible positioning of lamp ensures optimal lighting while minimising glare
- Black matte surface prevents irritating reflections
- Robust plastic housing facilitates cleaning
- Maximum user comfort thanks to large locking levers
- Recessed connector socket and round barrel connector facilitate plug-in
- Made in Germany

Table lamp with rechargeable battery in one individual light temperature of choice

Table lamp mains operated in one individual light temperature of choice

■ MULTILIGHT Pro Table

The table lamp is available in different versions: mains or battery (rechargeable) operated, in one or three light temperatures, with standard or extended arm, with foot or table clamp. The perfect lamp for every situation.

- Versatile in use thanks to long power cord for mains operation or with rechargeable battery
- Lamp head can be swivelled in any direction and even pulled right down to the table top
- Foldable design for space-saving storage; standard arm versions also ideal for mobile use

■ MULTILIGHT Pro Floor

Powerful floor lamp in slim design that stands rock solid.

- Available in one or three light temperatures
- Greater flexibility thanks to extended arm to position the light exactly where it is needed

MULTILIGHT Pro Floor 3in1 Mains operated, 3 light temperatures

 Weight: approx. 3.8 kg; power cord: 150 cm

Table lamp with rechargeable battery and 3 light temperatures

People with reduced visual acuity often also experience lower contrast sensitivity.

Decreased contrast sensitivity may arise from cloudy ocular media, retinal deposits, the loss of receptor cells or similar.

Special blue blocking or comfort filters provide help in this context and enhance the ability to see in contrast.

Visually impaired people frequently express the desire to be able to watch TV and to read newspapers, bank statements, telephone directories or drug package inserts, for example.

Consequently, maintaining or restoring reading ability is essential when it comes to magnifying aids. Telescopic systems are a possible solution to this challenge, since they enable both near and distance viewing.

Telescopes with a magnification power of up to 6x can be mounted on a frame to create hands-free telescopic spectacles. For higher magnification strengths, hand-held monocular telescopes are also available.

Small and lightweight fixed focus Galilean telescope with multi-coated lenses in an aluminium housing.

- Two groups of computer-optimised lenses with multilayer AR coating
- Designed for mounting in a frame, lock ring included
- Ideal for SCHWEIZER telescope frames as shown on pages 52 – 53
- Factory-set to infinite focal distance; front caps for intermediate (e.g. TV) and close distances (e.g. reading) available
- Refractive errors can be corrected with a lens mounted on the system's ocular side (Ø 22 mm). Adjustment to the working distance possible with the same corrective lens
- Calculation of the required plus lens power for adjusting the focal distance by multiplying the system magnification by itself and dividing the result by the focal distance required in metres
- Binocular use for close working distances possible with special mounting lenses

Download now

Calculation charts for SCHWEIZER Galilean systems at www.improvision-lvs.com

■ Front caps

Front caps for intermediate (e.g. TV) and close distances (e.g. reading).

- Basic front cap snaps into place with audible click for firm hold
- Optional Add-on front caps can be combined with Basic front caps to provide higher magnification and variable working distances. Add-on front caps flip up easily when not in use
- Combined use of Basic and Add-on front cap creates an aplanatic front cap without spherical aberrations
- Different working distances ranging from 200 to 4.17 cm can be combined
- Calculation of the working distance based on the system's pre-set infinite focal distance by dividing 1 by the D power of the front cap(s). The close distance magnification is the system magnification multiplied with one quarter of the D power of the front cap(s)

■ Binocular use

Mounting lens for binocular use with the relevant convergence.

- Mounting lens packed in pairs with mounting adapters for corrective lenses
- Mounting lens made from PMMA (Plexiglas®)

937116 Case for telescopic spectacles

931287 Trial box Galilei 1.8x

Contents: 2 pieces of 1.8x in adapter for trial frame;
2 Basic front caps in +0.5 D;
1 titanium telescope frame 935806;
measuring tape;
empty slots for additional Basic and Add-on front caps

931067 Trial box Galilei 2.1x and 2.5x

Contents: 2 each in 2.1x and 2.5x in adapter for trial frame;
Basic front caps 2 each in +0.5 D, +0.66 D, +1.0 D and
1 each in +1.5 D, +2.0 D, +3.0 D, +4.0 D, +5.0 D,
+6.0 D, +8.0 D;
Add-on front caps 1 each in +4.0 D, +8.0 D

**Mounting lens
with adapter for 15 mm corrective lens**

933225 Binocular use for
200 mm working distance, 2 pieces

933255 Binocular use for
250 mm working distance, 2 pieces

933235 Binocular use for
330 mm working distance, 2 pieces

933265 Without convergence for
reduced back vertex distance BVD, 2 pieces

Convergence adapter for trial frame

933315 200 mm; 5.0 D, 2 pieces

933325 250 mm; 4.0 D, 2 pieces

933335 330 mm; 3.0 D, 2 pieces

Keplerian telescopes

Small and lightweight focusable Keplerian telescope.

- Multi-coated achromatic precision optics
- Focusable from infinity to near distance
- Designed for mounting in a frame, 2 lock rings included
- Optional adapter allows use of front caps of SCHWEIZER Galilean telescopes for intermediate and close working distances
- Ideal for SCHWEIZER telescope frames as shown on pages 52 – 53

931935 3x9

Distance magnification 3x
Near magnification approx. 4.5x at 22 cm
Field of view 12.5°, objective Ø 9 mm, 23 g
Silver black metal housing

931945 4x10

Distance magnification 4x
Near magnification approx. 5.5x at 22 cm
Field of view 10.0°, objective Ø 10 mm, 25 g
Silver black metal housing

931955 4x12

Distance magnification 4x
Near magnification approx. 5.5x at 20 cm
Field of view 12.5°, objective Ø 12 mm, 42 g
Silver black metal housing

Not shown:

932165 6x16

Distance magnification 6x
Near magnification approx. 11.0x at 26 cm
Field of view 10.0°, objective Ø 16 mm, 77 g
Black metal housing

931077 Trial box Kepler

Contents: 1 each of 3x9, 4x10 and 4x12 in adapter for trial frame;
1 focus stop ring each for 3x9, 4x10 and 4x12;
1 adapter for Basic front caps suitable for 3x9, 4x10;
1 empty slot for 6x16 monocular with finger ring (not included)

■ Application tip

SCHWEIZER Keplerian systems can be focused to different working or reading distances as required. Furthermore, they offer the following application options:

■ Application with focus stop ring

The eye care professional adjusts the telescope focus to the desired distance, e.g. for watching TV, and fastens the focus stop ring on the housing to act as a stopper.

For closer working distances, the visually impaired person can still turn the objective lens outwards until the image is crisp and clear. Turning the objective lens back until the stopper is reached, refocuses the telescope for the original application, such as watching TV.

■ Application with fixed focus

The eye care professional adjusts the telescope focus to the desired distance, e.g. for watching TV, and locks this setting using the locking screws in the housing. For close working distances, the front caps of SCHWEIZER Galilean telescopes can be used with an adapter.

It is recommended to use fixed focus systems for visually impaired people who lack the necessary fine motor skills.

Focus stop ring

932525 Suitable for 3x9

932555 Suitable for 4x10

932505 Suitable for 4x12

938025 Adapter for Basic front caps

Suitable for 3x9, 4x10

932535 Adapter for Basic front caps

Suitable for 4x12

937116 Case for telescopic spectacles

Telescope frames

Only special telescope frames designed for a perfect anatomic fit ensure the ideal function and efficient use of telescopic spectacles.

■ Titanium telescope frames with variable saddle bridge system

- Material: 100% titanium, welded, hypoallergenic, solder-free, screws and saddle bridge insert made from stainless steel
- Weight: 16 g
- Temple: Golf temple 145 mm, easy to shorten, silicone-coated plastic temple ends, common sport temple ends mountable
- Adjustable saddle bridge, flat saddle bridge for reduced back vertex distance BVD included
- Meets the technical and medical requirements for listed aids of the compulsory health insurance in Germany
- Unisex: style and colouring suitable for men and women alike

Size 47-18-145

935716 Ice blue colour, matt
Size 50-18-145

935726 Ice blue colour, matt
Size 53-18-145

935826 Titanium grey colour, matt
Size 47-18-145

935806 Titanium grey colour, matt
Size 50-18-145

935816 Titanium grey colour, matt
Size 53-18-145

Please note:

In most cases a large back vertex distance BVD is necessary for telescopic spectacles. SCHWEIZER telescope frames are designed accordingly. However, if needed, the BVD of the titanium telescope frames with variable saddle bridge systems can be reduced by 3 mm. For this purpose, a **flat saddle bridge** (included) can be mounted. This is a fast and easy way to react to different optical and anatomic conditions.

937116 Case for telescopic spectacles

■ Titanium telescope frames

- Material: 100% titanium, welded, hypoallergenic, solder-free, screws and saddle bridge insert made from stainless steel
- Weight: female model 16 g and 17 g, male model 17 g and 18 g
- Temple: Golf temple 145 mm, easy to shorten, silicone-coated plastic temple ends, common sport temple ends mountable
- Adjustable saddle bridge
- Ideal for curved mounting lenses
- Meets the technical and medical requirements for listed aids of the compulsory health insurance in Germany
- Stylish female and male model

936076 Trial box telescope frames

Contents: 6 telescope frames of your choice

936097 Box of mounting parts

932545 Adapter Galilei for trial frame

Pack of 2 pieces

932575 Adapter Kepler for trial frame

Pack of 2 pieces

936087 Lock ring mounting tool

Frame mounting of telescopes

■ Box of mounting parts

This box contains all mounting parts required for mounting a telescope in a frame: trial frame adapters, lock ring mounting tool, mounting lens with and without mounting hole made from CR39 (3 pieces each), set of washers, adapters for corrective lens, spare lock rings, penlight, titanium telescope frame.

■ Individual mounting parts

932765 Mounting lens with mounting hole

3 mm thick, CR39, Ø 80 mm, pack of 2 pieces

932865 Mounting lens without mounting hole

3 mm thick, CR39, Ø 80 mm, pack of 2 pieces

932855 Mounting lens without mounting hole, frosted

3 mm thick, CR39, Ø 80 mm, 1 piece

932715 Washer 0.5 mm thick

Pack of 6 pieces

932725 Washer 1.0 mm thick

Pack of 6 pieces

932735 Washer 2.0 mm thick

Pack of 6 pieces

932745 Set of washers

6 pieces each of 0.5 mm, 1.0 mm and 2.0 mm thickness

932775 Aluminium adapter for corrective lens (Ø 22 mm)

Pack of 2 pieces

932785 Aluminium spare lock ring

Pack of 2 pieces

936305 Penlight

Monoculars

■ Hand-held Keplerian telescope

- Multi-coated achromatic precision optics
- Fold-down rubber eyecup for spectacle wearers to correct BVD
- Ideal for retaining individual mobility (ability to see street signs, train or bus schedules, price tags, etc.)
- Small and handy
- Focusable from infinity to near distance
- Soft case and neck cord included
- Use as a hand microscope with the acrylic stand, which can also be used separately as a 3x stand magnifier

Transparent acrylic stand

933205 Suitable for 6x16, 8x20, 10x20

933285 Suitable for 8x30, 10x30

Finger ring

933775 Suitable for 3x9, 4x10, 4x12

933215 Suitable for 6x16, 8x20

■ Extender

Multi-functional aid for mobile use. Comfortable viewing thanks to steady and brilliant image.

- Easy to use hand-held telescope (similar to a 2x fixed focus telescope) with a large depth of field
- Inverting the extender doubles the field of vision – ideal for tunnel vision and retinitis pigmentosa (RP)
- Textured grip ensures excellent feel
- Fold-down rubber eyecup for spectacle wearers to correct BVD
- Convenient lanyard loop (lanyard included)

931965 Monocular 4x12

Distance magnification 4x, near magnification approx. 5.5x at 20 cm
Field of view 12.5°, objective Ø 12 mm, 53 g
Silver black metal housing

931975 Monocular 6x16

Distance magnification 6x (20x with acrylic stand)
Near magnification approx. 11.0x at 26 cm
Field of view 10.0°, objective Ø 16 mm, 80 g
Silver black metal housing

931985 Monocular 8x20

Distance magnification 8x (25x with acrylic stand)
Near magnification approx. 17.5x at 30 cm
Field of view 7.0°, objective Ø 20 mm, 77 g
Silver black metal housing

Not shown:

931995 Monocular 8x30

Distance magnification 8x (25x with acrylic stand)
Near magnification approx. 13.5x at 60 cm
Field of view 8.5°, objective Ø 30 mm, 159 g
Black metal housing

933025 Monocular 10x20

Distance magnification 10x (30x with acrylic stand)
Near magnification approx. 18.5x at 27 cm
Field of view 6.0°, objective Ø 20 mm, 84 g
Black metal housing

933035 Monocular 10x30

Distance magnification 10x (30x with acrylic stand)
Near magnification approx. 15.0x at 70 cm
Field of view 6.0°, objective Ø 30 mm, 172 g
Black metal housing

943225 Extender

Magnification 2x, field of view 34.0°
Objective Ø 44 mm

943315 Extender with AMD filter

Magnification 2x, field of view 34.0°
Objective Ø 44 mm

Assessment charts help eye care professionals systematically detect and treat vision disorders. These indispensable tools have been specifically designed for low vision assessment and are all supplied with quick start guides.

Reading stands holding books or newspapers enable visually impaired people to read in a comfortable and relaxed position.

Miscellaneous

Contents

Vision tests p. 58

Reading stands p. 59

Vision tests

- SZB Bailey-Lovie chart set
- Set of 2 panels with logarithmic progression of optotypes
- 5 optotypes per visual acuity level
- Suitable for use at any viewing distance
- Panel 1 for measuring distance visual acuity at normal contrast
- Panel 2 for measuring distance visual acuity at low contrast
- Dimensions: 56x65 cm (WxH)

938147 SZB Bailey-Lovie chart set

938147-1 SZB Bailey-Lovie chart set

each panel divided into upper and lower half

938157-EN Near vision reading test set

to determine the magnification requirement for near vision including Amsler grid test

938107-EN Amsler grid test

■ Near vision reading test set

Up-to-date test in logarithmic layout according to DIN 58220 and ISO 8596. The test chart consists of unrelated sentences in different letter sizes. The notation below the smallest print the patient can still read fluently indicates the magnification required for reading newsprint. The Amsler grid test is included in the set.

■ Amsler grid test

The Amsler grid test for detecting and monitoring symptoms of macular degeneration is straightforward to administer. It comes printed on sturdy paper for ease of use.

Reading stands

■ Standard reading stand

- Large surface with a size of 37.5 x 50 cm
- Solid and easy to use
- Designed not to slip on a table surface
- Inclination adjustable in multiple steps
- Natural wood

■ Economic reading stand

- Surface with a size of 32 x 28 cm and a fixed inclination of 23°
- White plastic
- Pack of 2 pieces

937206 Standard reading stand

937236 Economic reading stand
