

# esytime

*a new generation of  
Braille devices*

**all-in-one  
Braille computer  
+ notetaker**

## **ESYSUITE, the ideal addition**

**esysuite** is a very powerful optional software suite found inside **esytime**, designed specifically for the educational environment.

It transforms your **esytime** into a notetaker which operates independently from Windows 7.

**esysuite** is easy to keep up to date and can be upgraded with new modules and features to meet the evolving needs of Braille users. It requires no previous computer knowledge and it has its own high quality speech synthesizer.

**esysuite** consists of several software modules:

- **esynote** (text editing and Braille transcription)
- **esyfile** (file management)
- **esycalc** (calculator)
- **esyschool** (schedule management)
- **esyocr** (Optical Character Recognition)
- **esymath** (tool supporting math problems and course)

see more details on next page

**esytime** is a new generation Braille device, it is both a notetaker, Braille computer and a Braille display all-in-one, compact and autonomous.

**esytime** is equipped with a 32-character Braille display, a 10 key Braille keyboard, 2 joysticks, 8 function buttons and a exchangeable battery providing up to 13 hours autonomy.

**esytime** is available in two versions: **esytime standard**, equipped with 32 cursor routing keys for Braille display navigation and the **optical esytime**, equipped with a new patented optical navigation which responds to the movements of the fingers for reading, moving the cursor or validate menu selections.

### **A true Braille computer**

Windows 7 provides the stability of **esytime**. NVDA screen reader is standard, included ready to use. Alternatively, you can install Jaws, Supernova, Cobra... or other compatible Windows software needed and of course connect your peripherals (printers, scanners...). There are no more software compatibility issues or preferred file formats!

You can also browse the Internet or manage your email anywhere using Wifi... No need to have both a PC and a Braille notetaker with you: **esytime** is enough! .

---

*Using its Braille terminal mode, **esytime** can be connected to your personal or business computer with a standard screen reader for reading, working and navigation*

---

## Features, compatibilities and more...

### Spécifications

- 32 Braille cells
- Navigation with optical Sensors (optical version) or cursor routing keys (standard version)
- 10 key Braille keyboard
- 2 joysticks
- Intel Atom Dual Core
- Windows 7 Home Premium & Office Starter
- Installed software: NVDA, LibreOffice
- 2GB ram, 320GB hard disk drive
- 3 USB ports + 1 mini USB
- SD-card reader
- VGA port
- Ethernet port
- Bluetooth 3.0 and WiFi
- Integrated stereo loudspeakers & microphone
- Audio in / out
- Anti-theft protection (cable lock slot)
- Exchangeable battery (8 hours autonomy)
- Protection case
- Size: 26 x 18 x 2,5 cm
- Weight: 1,2 kg
- Warranty: 2 ans

### Compatibility

Jaws, Supernova Access suite, Window-Eyes, VoiceOver Mac Cobra, Linux, NVDA, BNFA

### Optional

- esysuite software
- Windows 7 Pro upgrade
- External DVD±RW
- High capacity battery (13 hours)
- Change to 256 GB SSD drive
- Flat panel screen 14 inch USB
- EmPrint or EmBraille personal embosser
- Extended Warranty

All Windows compatible software or devices can be used with **esytme**

### *esysuite consists of several software modules:*

- **esynote** : manage different types of Braille in the same document, such as 8-dot computer Braille, Grade 1 and Grade 2 (contracted Braille), mathematical (integrates scientific calculations) Braille code and international Braille music code. It is possible to create a single printable document in Braille or in black ink characters. esynote makes the conversion to optimize black ink printing.
- **esyfile** : use the file manager to organize your files, folders and subfolders.
- **esyschool** : manage your schedule and the tasks in the student assignment booklet.
- **esycalc** : calculator
- **esyOCR**, using this menu option combined with a simple scanner allows you to scan documents and display their content in braille or as audio output. esyocr converts your esytme to a reading machine.
- **esymath** is a unique tool supporting math problems and course tasks displaying them in black ink characters and braille or vice versa.

**esysuite** also features access to Internet, an audio- and Daisy player!
