

Product solutions for

Improved Vision

2022/2023

Who we are

ImproVision is a subsidiary of SCHWEIZER and services the company's global export activities. Established in 1840, SCHWEIZER is one of the oldest owner-managed companies in the German ophthalmic optics sector and boasts one of the world's largest ranges of specialist visual optical aids.

SCHWEIZER stands for many firsts in low vision care – be it the world's first modular magnifier system with interchangeable magnification heads, the world's first LED illuminated magnifier, the world's first ergonomic magnifier or the world's first magnifier with inductive charging.

Unrivalled quality is another pillar of SCHWEIZER's strategy. All its illuminated and reading magnifiers are still

Made in Germany

at the company's German headquarters in Forchheim.

What we offer

- Global access to SCHWEIZER's range of product solutions for improved vision in addition to our own range of high addition and light protection spectacles.
- Professional advice, technical expertise and bespoke support to help our partners grow their business.
- Regular and comprehensive professional training, be it in the classroom or online through our partner www.optik-akademie.com.

High Addition Spectacles

The retinal image can be enlarged by reducing the distance between the object and the eye below the normal reading distance (relative distance or approach magnification).

However, the presbyopic eye is no longer able to focus on objects at such a close distance. This loss of accommodative ability requires corrective optics such as high addition spectacles.

Patients with binocular potential need glasses with base-in prisms to support convergence.

BINO med S2

Prismatic half-eye spectacles with a pair of high addition lenses including prisms to support convergence for binocular close distance magnification.

- Spherical CR 39 lenses
- Metal frame in 2 colours in size 40-25, temple length 142 mm
- Supplied with protective case
- Made in Germany

IV PRISMATIC

Prismatic half-eye spectacles with a pair of high addition lenses including prisms to support convergence for binocular close distance magnification.

- Spherical CR 39 lenses
- Black polymer frame
- Supplied with protective case
- Made in Sweden

IV MICROSCOPIC

Microscopic half-eye spectacles with one high addition lenticular lens and one CR 39 plano lens on the other side for monocular close distance magnification.

- Spherical CR 39 lenses
- Black polymer frame
- Supplied with protective case
- Made in Sweden

Magnifiers

Magnifiers are one of the traditional aids to improve vision and are thus a preferred solution for visually impaired people. They are used wherever it is necessary to enlarge an image. Be it for reading, in cases of reduced visual acuity, or to see details more clearly in hobby or leisure activities.

Illuminated magnifiers combine such an enlarged image with the advantages of optimised lighting. Individually tested light temperatures improve contrast vision and thus visual acuity. Modern illuminated magnifiers are mainly battery-operated. One of the latest innovations in this field uses wireless charging and thus eliminates the need to replace batteries.

ERGO-Lux i mobil

ERGO-Lux i mobil – the lifestyle magnifier with inductive charging. In addition to 2 brightness levels and a choice of 3 light temperatures, the key advantage of this new magnifier lies in its wireless charging capability which eliminates the need to replace batteries.

- Power supply by induction (Qi standard) – no battery replacement, no cable inserted into the magnifier
- Easy-to-feel boost switch provides audible feedback when operated and controls 2 brightness levels for optimised lighting
- Rechargeable lithium-polymer battery with 7-hour operating time at boost level and max. 3-hour charging time; just 10 min. charging needed for 1 hour light
- High contrast, even spread of light thanks to ideal adjustment of light intensity
- Ergonomic design and soft-touch zone for extra grip strength and pleasant feel in timeless white/charcoal grey
- Convenient integrated lanyard loop
- Aspheric lightweight lenses
- Supplied with microfibre pouch for storage and cleaning
- Order any of these magnifiers without charging pad, USB cable and USB power adapter by taking -1 off the item no. (e.g. 152122)
- Light temperatures: **2700 K** **4500 K** **6500 K**

ERGO mobil Base

The ERGO mobil Base reading and writing stand converts any ERGO-Lux MP mobil or ERGO-Lux i mobil hand magnifier into a stand magnifier WITHOUT COMPROMISING image quality. Easy-to-use stand for comfortable reading at exactly the right distance to the object viewed.

ERGO mobil Base up to 24 D can also be used in an upright position, leaving both hands completely free for close-up work.

- Versatile design enables use in different positions – ideal for work where both hands are required
- Suitable for left and right-handed use
- Black matt, textured surface promotes stable grip
- For mobile use, simply remove the magnifier from the stand
- A total of 12 stands in individual heights are available for the different magnifier powers, ranging from 6 D to 56 D to provide exactly the right distance to the object viewed
- Suitable ERGO-Lux MP/ERGO-Lux i mobil magnifiers available separately

MODULAR LED

Battery operated illuminated stand magnifier with 3 multi-chip SMD LEDs in a choice of 3 light temperatures.

- Easily interchangeable open magnification heads, available in different magnification powers
- Possibility to write under the low power lenses
- Adjustable head tilt for right or left-handed use
- Very bright, consistent and high-contrast light through 3 precisely aligned special light emitting diodes
- Easy battery replacement thanks to hinged battery box cover
- Aspheric lightweight lens
- Supplied with microfibre pouch for storage and cleaning
- 3 AA alkaline batteries required
- Light temperatures: **2700 K** **4500 K** **6500 K**

Items can be ordered with or without the necessary batteries as per price list.

TWIN-Lux MP

Illuminated stand magnifier with Multi-Power light option and three multi-chip SMD LEDs in a choice of 3 light temperatures.

- Easy-to-feel boost switch provides audible feedback when operated and controls 2 brightness levels for optimised lighting
- Very bright, consistent and high-contrast light through 3 precisely aligned multi-chip SMD LEDs
- Comfortable reading posture through ergonomically tilted design
- 3.5x magnification thanks to aspheric lightweight lenses placed at an accurately computed distance
- Wide field of view covers the entire span of a typical newspaper column
- 20-hour operating time at boost level
- Supplied with microfibre pouch for storage and cleaning
- 3 AA alkaline batteries required
- Light temperatures: **2700 K** **4500 K** **6500 K**

Items can be ordered with or without the necessary batteries as per price list.

RIDO-Clip

Clip-on magnifier

- 2 joined lenses including prisms to support convergence
- Clips to the spectacles of the wearer
- 3 different magnification powers
- Hard coating
- Solid case included

In comparison with standard magnifiers, this clip-on magnifier has **some advantages**:

- Lightweight
- Wide field of view
- Base-in prisms improve eye convergence
- Simply clips onto spectacles for ease of use
- Allows hands-free activities

RIDO-Clip set with all lens parts

Pack of 2

Video magnifiers

In most cases, visually impaired people can improve their vision with traditional optical aids. In some situations, electronic solutions can be of further help. The video magnifiers featured in the SCHWEIZER eMag series provide additional options to improve vision around the home or on the go.

Please refer to
www.improvision-lvs.com
 for detailed information
 on these products

LowVision lamps

One of the key elements of low vision solutions is the provision of special lighting to suit the patient's individual needs.

Multiple studies conducted with visually impaired people have shown that the provision of appropriate lighting can significantly improve visual acuity. An individually tested light temperature is more pleasant and improves visibility for reading or other close tasks noticeably. Optimised lighting can often significantly reduce the magnification power otherwise required.

The innovative MULTILIGHT Pro lamp series by SCHWEIZER has been developed with the user's needs in mind and is ideal for all visually impaired people.

Made in Germany not only stands for sophisticated technology and maximum durability thanks to selected materials, but also for an elegant design and intelligent functionality – produced locally in Forchheim/Germany.

Contents

General information about MULTILIGHT Pro	31
MULTILIGHT Pro	32

General information about MULTILIGHT Pro

Designed for visually impaired people, the MULTILIGHT Pro LED lamp series features numerous innovative ideas.

- 9 different product versions for multiple applications
- Large central control panel in contrasting colour for easy one-touch operation
- Audible ON/OFF feedback
- Low energy consumption and high performance
- Available in 3 light temperatures (warm white – 2700 K, neutral white – 4500 K and cool white – 6500 K)
- Features the tried and tested LEDs of SCHWEIZER's illuminated magnifiers – no mixing of light temperatures!
- 2 brightness levels (100% and 70%)
- Lithium-ion battery with approx. 4-hour operating time and approx. 3-hour charging time
- Easy-to-recognise battery status
- Flexible positioning of lamp ensures optimal lighting while minimising glare
- Black matte surface prevents irritating reflections
- Robust polymer housing facilitates cleaning
- Maximum user comfort thanks to large locking levers
- Recessed connector socket and round barrel connector facilitate plug-in
- Made in Germany

MULTILIGHT Pro Table

The table lamp is available in different versions: mains or battery (rechargeable) operated, in one or three light temperatures, with standard or extended arm, with foot or table clamp. The perfect lamp for every situation.

- Versatile in use thanks to long power cord for mains operation or with rechargeable battery
- Lamp head can be swivelled in any direction and even pulled right down to the table top
- Foldable design for space-saving storage; standard arm versions also ideal for mobile use
- Table lamp with clamp is rotatable
- Light temperatures: **2700 K** **4500 K** **6500 K**

Light protection spectacles

People with reduced visual acuity often also experience lower contrast sensitivity.

Decreased contrast sensitivity may arise from cloudy ocular media, retinal deposits, the loss of receptor cells or similar.

Special blue blocking or comfort filters provide help in this context and enhance the ability to see in contrast.

Contents

General information about filters	35
Filter lenses and properties	36
Fit-Over spectacles	37
Wrap-Around spectacles	40

Comfort filter (CF)

medi-lens special filter lenses with “**blue attenuating properties**” minimise the effects of blue light from natural and artificial light sources. In addition to preventing light-induced damage to the retina, they increase contrast vision in everyday life and are ideal for sports and leisure activities as well as at work. They selectively filter out the blue portion of sunlight, which often superimposes itself on the other colours, to an ideal level. Some of the filters pass the standards for traffic signal requirements. By improving the contrast of objects in diffused or dim lighting, they provide a more natural visual experience.

The **medi-lens Comfort filter CF-LED** has been specifically developed for computer work and reduces eye strain caused by LED light sources.

The **medi-lens Comfort filter MIGRAINE-Comfort 22 and MIGRAINE-Comfort 37** can significantly reduce eye strain caused by light and glare sensitivity, computer screen and fluorescent lighting. Whether worn indoors or outdoors, the light-coloured lenses provide relief in the event of a migraine attack or headache. Since the change in colour perception is minimal, wearers get used to them in next to no time. The lenses can be combined with an additional polarising filter and also worn as fit-over spectacles or sunglasses.

Blue blocker (BB)

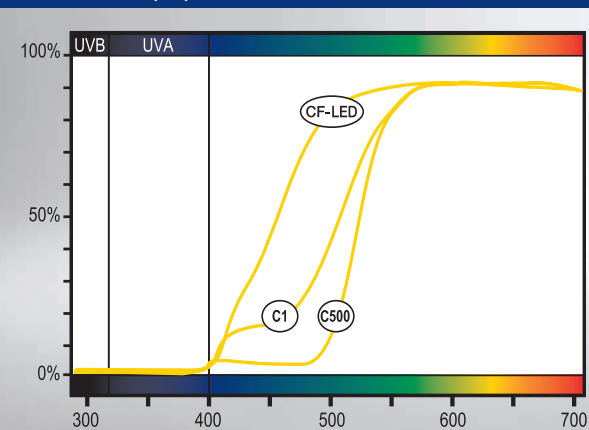

medi-lens special filter lenses with “**blue light blocking**” properties offer maximum protection against short-wavelength light emitted by natural and artificial light sources while optimising contrast vision. They are primarily used in medical treatment. In terms of transmission and absorption, these filter lenses feature a sharp “edge” in the visible light range, i.e. a sudden transition from high-transmission to high-rejection of wavelengths in the electromagnetic spectrum. They cut off part of the light spectrum at a defined point and absorb all high-energy UV light and the blue portion of visible light below this point. Blue blockers up to 450 nm are suitable for day driving.

Polarising filter

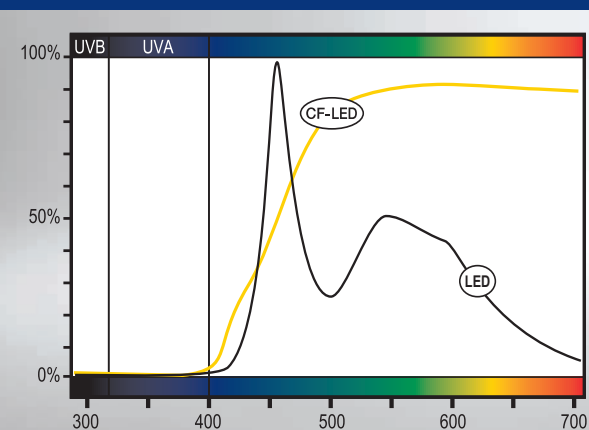

By combining contrast-enhancing filters with an additional polarising filter, reflections can be reduced even more without impairing contrast vision.

Polarising filters minimise glare and reflections from horizontal surfaces such as flat, horizontal floors or wet streets. POL1 filters come with a grey basic tint of 65%, POL3 filters with 85 %.

LifeLine series – FILTER COVER 2

These blue blocking/comfort filter spectacles are worn over correction eyewear and are ideal for outdoor activities.

- Maximum protection against light and wind
- Side protection minimises glare
- Semi-transparent side windows in matching frame colour ensure unhindered vision
- Extremely lightweight thanks to polymer lenses
- Blue blocking/comfort filter lenses (optional with additional 65 % POL1 or 85 % POL3) provide excellent light protection, improve contrast vision and prevent retinal damage – ideal for different eye conditions
- Soft-edged frame in 2 lens sizes
- Optionally available with AR coating applied to the back surface of the lens (B-AR)
- Also available with prescription lenses (base curve 4)

LifeLine series – FILTER COVER 3

These blue blocking/comfort filter spectacles are worn over correction eyewear and are ideal for outdoor activities.

- Maximum protection against light and wind
- Side protection minimises glare
- Semi-transparent side windows in matching frame colour ensure unhindered vision
- Extremely lightweight thanks to polymer lenses
- Blue blocking/comfort filter lenses (optional with additional 65 % POL1 or 85 % POL3) provide excellent light protection, improve contrast vision and prevent retinal damage – ideal for different eye conditions
- Straight-edged frame in 2 lens sizes
- Optionally available with AR coating applied to the back surface of the lens (B-AR)
- Also available with prescription lenses (base curve 4)

Telescopes

Visually impaired people frequently express the desire to be able to watch TV and to read newspapers, bank statements, telephone directories or drug package inserts, for example.

Consequently, maintaining or restoring reading ability is essential when it comes to magnifying aids. Telescopic systems are a possible solution to this challenge, since they enable both near and distance viewing.

Telescopes with a magnification power of up to 6x can be mounted on a frame to create hands-free telescopic spectacles. For higher magnification strengths, hand-held monocular telescopes are also available.

Contents

Galilean telescopes	42
Keplerian telescopes	44
Telescope frames	45
Frame mounting of telescopes	46
Monoculars	47

Galilean telescopes

Small and lightweight fixed focus Galilean telescope with multi-coated lenses in an aluminium housing.

- Two groups of computer-optimised lenses with multilayer AR coating
- Designed for mounting in a frame, lock ring included
- Ideal for SCHWEIZER telescope frames as shown on page 45
- Factory-set to infinite focal distance; front caps for intermediate (e.g. TV) and close distances (e.g. reading) available
- Refractive errors can be corrected with a lens mounted on the system's ocular side (Ø 22 mm). Adjustment to the working distance possible with the same corrective lens
- Calculation of the required plus lens power for adjusting the focal distance by multiplying the system magnification by itself and dividing the result by the focal distance required in metres
- Binocular use for close working distances possible with special mounting lenses

Galilean telescopes

937185 1.8x

Field of view 23°; 13 g

937255 2.5x

Field of view 18°; 20 g

937215 2.1x

Field of view 20°; 15 g

937275 2.7x

Field of view 13°; 30 g

Front caps

Front caps for intermediate (e.g. TV) and close distances (e.g. reading).

- Basic front cap snaps into place with audible click for firm hold
- Optional Add-on front caps can be combined with Basic front caps to provide higher magnification and variable working distances. Add-on front caps flip up easily when not in use
- Combined use of Basic and Add-on front cap creates an aplanatic front cap without spherical aberrations
- Different working distances ranging from 200 to 4.17 cm can be combined
- Calculation of the working distance based on the system's pre-set infinite focal distance by dividing 1 by the D power of the front cap(s). The close distance magnification is the system magnification multiplied with one quarter of the D power of the front cap(s)

Keplerian telescopes

Small and lightweight focusable Keplerian telescope.

- Multi-coated achromatic precision optics
- Focusable from infinity to near distance
- Designed for mounting in a frame, 2 lock rings included
- Optional adapter allows use of front caps of SCHWEIZER Galilean telescopes for intermediate and close working distances
- Ideal for SCHWEIZER telescope frames as shown on pages 45

Application tip

SCHWEIZER Keplerian systems can be focused to different working or reading distances as required. Furthermore, they offer the following application options:

Application with focus stop ring

The eye care professional adjusts the telescope focus to the desired distance, e.g. for watching TV, and fastens the focus stop ring on the housing to act as a stopper.

For closer working distances, the visually impaired person can still turn the objective lens outwards until the image is crisp and clear. Turning the objective lens back until the stopper is reached, refocuses the telescope for the original application, such as watching TV.

Application with fixed focus

The eye care professional adjusts the telescope focus to the desired distance, e.g. for watching TV, and locks this setting using the locking screws in the housing. For close working distances, the front caps of SCHWEIZER Galilean telescopes can be used with an adapter.

It is recommended to use fixed focus systems for visually impaired people who lack the necessary fine motor skills.

Trial box Kepler

931077

Contents: 1 each of 3x9, 4x10 and 4x12 in adapter for trial frame;
1 focus stop ring each for 3x9, 4x10 and 4x12;
1 adapter for Basic front caps suitable for 3x9, 4x10;
1 empty slot for 6x16 monocular with finger ring (not included)

SCHWEIZER Keplerian telescopes

931935 Kepler 3x9

Distance magnification 3x, near magnification approx. 4.5x at 22 cm

Titanium telescope frames with variable saddle bridge system

Only special telescope frames designed for a perfect anatomic fit ensure the ideal function and efficient use of telescopic spectacles.

- Material: 100% titanium, welded, hypoallergenic, solder-free, screws and saddle bridge insert made from stainless steel
- Weight: 16 g
- Temple: Golf temple 145 mm, easy to shorten, silicone-coated plastic temple ends, common sport temple ends mountable
- Adjustable saddle bridge, flat saddle bridge for reduced back vertex distance BVD included
- Meets the technical and medical requirements for listed aids of the compulsory health insurance in Germany
- Unisex: style and colouring suitable for men and women alike

Trial box telescope frames

939987

Contents: 6 telescope frames of your choice

Please note:

In most cases a large back vertex distance BVD is necessary for telescopic spectacles. SCHWEIZER telescope frames are designed accordingly. However, if needed, the BVD of the titanium telescope frames with variable saddle bridge systems can be reduced by 3 mm. For this purpose, a **flat saddle bridge** (included) can be mounted. This is a fast and easy way to react to different optical and anatomic conditions.

Case for telescopic spectacles

937116

Box of mounting parts

This box contains all mounting parts required for mounting a telescope in a frame: trial frame adapters, lock ring mounting tool, mounting lens with and without mounting hole made from CR39 (3 pieces each), set of washers, adapters for corrective lens, spare lock rings, penlight, titanium telescope frame.

Box of mounting parts

932575 Adapter Kepler for trial frame

Pack of 2 pieces

Hand-held Keplerian telescope

- Multi-coated achromatic precision optics
- Fold-down rubber eyecup for spectacle wearers to correct BVD
- Ideal for retaining individual mobility (ability to see street signs, train or bus schedules, price tags, etc.)
- Small and handy
- Focusable from infinity to near distance
- Soft case and neck cord included
- Use as a hand microscope with the acrylic stand, which can also be used separately as a 3x stand magnifier

Hand-held Keplerian telescope

931965 Monocular 4x12

Distance magnification 4x, near magnification approx. 5.5 x at 20 cm
Field of view 12.5°, objective Ø 12 mm, 53 g
Silver black metal housing

931975 Monocular 6x16

Distance magnification 6x (20x with acrylic stand)
Near magnification approx. 11.0 x at 26 cm
Field of view 10.0°, objective Ø 16 mm, 80 g
Silver black metal housing

931985 Monocular 8x20

Distance magnification 8x (25x with acrylic stand)
Near magnification approx. 17.5 x at 30 cm
Field of view 7.0°, objective Ø 20 mm, 77 g
Silver black metal housing

931995 Monocular 8x30

Distance magnification 8x (25x with acrylic stand)
Near magnification approx. 13.5 x at 60 cm
Field of view 8.5°, objective Ø 30 mm, 159 g
Black metal housing

933025 Monocular 10x20

Distance magnification 10x (30x with acrylic stand)
Near magnification approx. 18.5 x at 27 cm
Field of view 6.0°, objective Ø 20 mm, 84 g
Black metal housing

933035 Monocular 10x30

Distance magnification 10x (30x with acrylic stand)
Near magnification approx. 15.0 x at 70 cm
Field of view 6.0°, objective Ø 30 mm, 172 g
Black metal housing

Transparent acrylic stand

Can be used separately as a 3x stand magnifier or screwed onto monoculars. When combined with a monocular (6x16, 8x20, 8x30, 10x20 und 10x30), it acts as a hand microscope with 20x, 25x, or 30x magnification.

Transparent acrylic stand

933205

for monoculars 6x16, 8x20 and 10x20

933285

for monoculars 8x30 and 10x30

Finger ring

Facilitates holding a prism monocular during outdoor orientation.

Finger ring

933775 Finger ring small

for monoculars 3x9, 4x10, 4x12

933215 Finger ring large

for 6x16 and 8x20 monoculars with flat rubber eyecup

Extender

Multi-functional aid for mobile use. Comfortable viewing thanks to steady and brilliant image.

- Easy to use hand-held telescope (similar to a 2x fixed focus telescope) with a large depth of field
- Inverting the extender doubles the field of vision – ideal for tunnel vision and retinitis pigmentosa (RP)
- Textured grip ensures excellent feel
- Fold-down rubber eyecup for spectacle wearers to correct BVD
- Convenient lanyard loop (lanyard included)

Extender

New

943225 Extender

Magnification 2x, field of view 34.0°, objective Ø 44 mm

943315 Extender with AMD filter

Magnification 2x, field of view 34.0°, objective Ø 44 mm

Miscellaneous

Assessment charts help eye care professionals systematically detect and treat vision disorders. These indispensable tools have been specifically designed for low vision assessment and are all supplied with quick start guides.

Reading stands holding books or newspapers enable visually impaired people to read in a comfortable and relaxed position.
